

Forms of cooperation

Matchmaking | RWE Technology International | Profile

RWE Technology International services are intended to help companies deliver efficient and cost-effective energy projects. We provide sustainable value for our clients in power generation, mining and industrial sectors through the transfer of our knowledge delivering successful projects in the context of the energy transition. In order to carry out this work, we cooperate with clients and partners in ways that best suit their individual needs.

With our experience and know-how of our power, mining and renewable energy experts, we offer:

Developer's and Owner's Engineer

Services for owners to support and safeguard their interests. We assist and represent the owner during project design, development, construction and operation.

Investor's and Lender's Technical/Project Advisor

Services for lenders to support and safeguard their interests. We review, monitor and evaluate projects for investors, debt providers and/or bank engineers.

- Operational & technical support
- Forensic & remedial engineering
- Dispute resolution & dispute avoidance
- Expert witness/expert consultant
- Inspection management
- Analysis and assessments

Knowledge Transfer

- Training, Workshops, Expert Webinars and Mentoring

The **RWE Group** is one of Europe's largest producers of electricity and heat, based in Germany. RWE has deep expertise and a long history with >120 years in both mining engineering and power technology. Recently RWE has pledged to become carbon-neutral by 2040, investing massively in expanding renewables, consequently phasing out its coal business. With a large portfolio of projects in renewable energy production worldwide, RWE is working on >30 Green Hydrogen projects as a part of its hydrogen roadmap.

RWE Technology International GmbH is a global engineering consultancy and the in-house engineering pool within the RWE Group, responsible to develop, build and optimize energy assets. The roots of this company go back >55 years, to Rheinbraun-Bergbauberatung of 1965. Clients from the mining and power plant industries across the world have since profited from RWE's wealth of experience as planners and operators. Our > 350 experts enable industrial, commercial and public sector clients across Europe, the Americas and Asia-Pacific to advance efficiency, safety and sustainability of their energy projects.
